

Instructions Formel D Facecover

Attention

The self-produced mouth-nose-covers of Formel D are not a medical product and no tested personal protective equipment. They only serve to protect other people from potentially infectious droplets when the wearer coughs or sneezes.

INSTRUCTIONS FOR USE

1. The Mouth and Nose Cover (MNC) is made of 100% jersey cotton. It must be washed before first use. Use a washing machine with a program of at minimum 60°C.
2. Use the Mouth-Nose-Cover exclusively for projects within the Formel D Group and not for medical purpose.
3. Make sure that the MNC is seated correctly. It must cover nose and mouth completely. For further instructions on how to put on / take off the mask, please read the instruction "Correct handling of protective masks". You will find this instruction on your Formel D information board.
4. Keep a minimum distance of 1.5 - 2 meters to other employees. The issued mouth-nose cover is not a substitute for keeping the social distance. Masks must always be worn where this distance could be reduced (e.g. corridors, WC, tea kitchen, food distribution). In locations of the customer, his instructions for wearing masks must be observed.
5. Before and after weaning and after touching your MNC, you must wash your hands thoroughly with soap or hand disinfectant. The document "Instructions for washing and disinfecting hands" will help you to do this. You will find this instruction on your Formel D information board and in Formel D locations additionally in the washrooms.
6. As soon as you notice that the mask is soaked, e.g. by body sweat, exhaled air or coughing/sneezing, the MNC must be replaced. Ask your supervisor for the local procedure.
7. After using the mouth-nose-cover, i.e. at the end of the shift at the latest, it is cleaned at the Formel D location. You will receive a washed MNC from your supervisor.
8. If you take your MNC home for washing, wrap it in a plastic bag or similar so that adherent viruses cannot reach other objects/garments.

Instructions Formel D Facecover

INSTRUCTIONS FOR FACECOVER WASHING

1. In addition to the cleaning process provided by us, you can also wash your mouth-nose covers (MNC) at home.
2. In order to kill adherent viruses as effectively as possible, the MNC must be washed at minimum 60° C with a heavy-duty detergent. For faster drying you can also use a tumble dryer afterwards.
3. Washing together with other garments is basically uncritical, so that the washing machine does not have to be switched on exclusively for the MNC.
4. After washing/drying, the mask must be repacked in a plastic bag or similar and transported to the workplace.

Attention

If you wash your mouth-nose-cover at home, please make sure to come to work with a freshly washed MNC at all times. Otherwise you endanger yourself and others.

CONTACT PERSONS

For questions about the wearing of the mouth-nose-covers as well as about general protective measures regarding the Corona-Pandemic please contact the Corona Task Force of the Formel D Group:
