RMC  
Refining Manufacturing Center®

## YOUR SUCCESS IS OUR CLAIM.

**FORMEL D IS THE GLOBAL SERVICE PROVIDER TO THE AUTOMOTIVE AND COMPONENT SUPPLY INDUSTRY.**

We offer winning professional services and are deeply devoted to the quality that we in the team provide you. Drawing on profound expertise, we assist you in all areas along the entire automotive value chain – from development to production to after sales.

We work with you to define ways of achieving short-, medium- and long-term goals. Formel D offers you leading concepts and develops specific, scalable solutions that are tailored to your particular needs. We achieve convincing measurable and sustainable successes.

## YOUR SPECIALIST FOR PRECISION WORK ON VEHICLES.

### REFINING MANUFACTURING CENTER (RMC)

Automotive manufacturers have long outsourced activities which are not immediately related to production. But outsourcing can also be economically and strategically viable for parts of a company's own production processes. This is why Formel D developed and implemented the concept of the Refining Manufacturing Center (RMC). Today, serial models of an OEM are refined on the basis of the RMC concept by installing top-quality accessories.

### TRUST US WITH YOUR MOST VALUABLE ASSET.

We possess outstanding expertise in processing, finishing and personalizing vehicles with visual and technical accessory scopes as part of country-specific modifications. Because these installation options cannot usually be realized on the line due to timings, we offer a cost-efficient integrated solution in the form of our Refining Manufacturing Center (RMC). This concept is also the ideal solution for special-purpose and mini-series vehicles.

We look after all the setups and retrofits, and make sure that the vehicles arrive in the right place at the right time in the agreed quantity and quality.

Looking for an integrated solution for outsourcing production steps, including assembly and installation, in series quality ex-works, at the loading or unloading port? Formel D has worldwide experience.

## WE CREATE SYNERGIES THROUGH EXPERTISE.

We split our service portfolio into three areas, mirroring the entire automotive value chain. In each of these areas we provide detailed analyses, precision planning, reliable implementation, expert advice and support.

### PRODUCT DEVELOPMENT >

- Build up Mule and Test Vehicles
- Vehicle Testing
- Vehicle Test Center Operations
- Homologation
- Software Testing

### PRODUCTION >

- Supplier Sourcing and Readiness
- Launch and Series Management
- Quality Management
- Localization and Relocation
- Value Added Assembly

### AFTER SALES >

- Service Management
- Vehicle Management
- Dealer Management
- Warranty Management
- Software Management

Engineering | Consulting | Training | Operations

An RMC brings together the qualifications required for a specific task. If Formel D is involved merely as an installation partner, it concentrates on the areas of production planning and control as well as production quality and efficiency. If tasks from the area of purchased parts procurement are added, Formel D expands the qualification mix to include, for example, supplier and purchased parts qualifications, logistics management and material management. As a result, Formel D can organize task-specific production centers which are flexible in both place and time.

#### Your advantages at a glance:

- Formel D supports its customers both as a process partner and as a reliable partner for component assembly and the installation of equipment parts.
- A diverse, qualified team of employees is optimally suited to take charge of individual areas of the automotive process chain.
- Location and time schedule are defined according to the objectives of our customers.
- Due to know-how, synergies are generated.
